

Expert support, without the stress

We handle the complexity of compliance and program change—so your operations stay steady

Ecolab delivers more than world-class cleaning and sanitization chemistry.

We partner with Personal Care & Cosmetics manufacturers to provide end-to-end technical expertise, operational support, and continuous improvement programs. These services are included with chemistry to help you optimize plant performance, ensure compliance, and protect product quality.

Experts in Personal Care Regulatory Compliance

End-to-end Validation Support

Helps you stay
aligned as
regulations change

Supports audit-ready
documentation &
compliance practices

Guides cleaning
programs as
ingredients evolve

Protects your ability
to sell & scale across
markets

Expertise that supports the full picture

	What we provide	Why this matters
 Technical Expertise & Regulatory Insight	- Guidance on cleaning, sanitization and cGMP compliance - Support on global cosmetic regulations - Troubleshooting and onsite technical consultations	- Reduces regulatory risk - Ensures audit-ready operations - Strengthens product safety and brand trust
 Laboratory & Analytical Support – Soil and Residue Expertise	- Lab sample testing and chemistry performance evaluation - Validation strategy support and technical documentation - Recommendations for optimized cleaning processes based on testing	- Data-driven decision making - Accurate product to process fit - Faster resolution of cleaning challenges
 On-Site Expertise & Operational Support	- Onsite assessments to identify contamination risks and process bottlenecks - Cleaning and sanitization development tailored to your equipment and formulations - Ongoing support from your local account manager to ensure continuous improvement	- Improved cleaning efficiency - Reduced downtime - Increase equipment reliability and throughput
 Change Management & Implementation Support	- Multi-site cleaning protocol harmonization - SOP support and updates - End-to-end rollouts from planning to full implementation - Project timelines & cross-team coordination	- Smooth onboarding of new procedures - Faster scale up across plants - Reduce risk of inconsistencies
 Training & Knowledge Transfer	- Custom training on cleaning validation, cGMPs, and best practices - Onboarding programs for new staff - Programs for ongoing education	- Stronger operational capability - Less variability between shifts - Long-term sustainability of cleaning programs
 Savings Identification	- Identify optimization and automation opportunities - Process improvements that reduce cycle time, water, energy and chemical use - Best practice recommendations to increase efficiency	- Improved safety and reliability through automation - Measurable improvements in productivity - Greater environmental sustainability
 Industry Thought Leadership	- Webinars, seminars and speaking engagements - Published articles and industry insights - Collaboration on emerging trends and regulatory updates	- Stay current with evolving standards - Access to global expertise and benchmarking - Support strategic planning

Whatever the challenge, you're not navigating it alone. Speak to your **Ecolab Account Manager** or visit or visit ecolab.com/personalcare to learn more
